DETAILED ACTION

Terminal Disclaimer

1. An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c). Accordingly, the terminal disclaimer filed 4/24/2009 has NOT been accepted.

Response to Arguments

2. Applicant's amendments and arguments with respect to the rejection of claims 13-24 under 35 U.S.C. § 101 have been fully considered and are persuasive. Accordingly, that rejection has been withdrawn.

3. Applicant's amendments and arguments with respect to the rejection of claim 43 under 35 U.S.C. § 112, second paragraph have been fully considered and are persuasive. Accordingly, that rejection has been withdrawn.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-43 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 6,728,776.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-43 of the present application contain substantially identical limitations to claims 1-33 of U.S. Patent No. 6,728,776, except that claims 1-43 of the present application additionally specify that the user may choose to continue communicating the locally stored data or resume communication of the second data and that the second set of data is an interactive streaming data set that may be a video game.

The Examiner takes Official Notice that video games were old and well known types of interactive data streams at the time the invention was made. One of ordinary skill in the art would have been able to transmit a video game as the second data set and would have seen the benefits of doing so, since it would have allowed supplemental content to be provided from local storage in the event that insufficient data was available from the stream.

Furthermore, nonfunctional descriptive material cannot render nonobvious an invention that would have otherwise been obvious. *In re Ngai*, 367 F.3d 1336, 1339, 70 USPQ2d 1862, 1864 (Fed. Cir. 2004). *Cf. In re Gulack*, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983) (when descriptive material is not functionally related to the substrate, the descriptive material will not distinguish the invention from the prior art in terms of patentability). In this case, the type of data contained in the second set of data has no functional relationship to the claimed method/system.

The Examiner also takes Official Notice that prompting a user to resume a paused operation was old and well known in the art at the time the invention was made. One of ordinary skill in the art would have easily been able to implement a system that prompted the user when the suspended stream was ready to resume, and would have seen the benefits of doing so, such as allowing the user to resume the suspended stream immediately or wait until the locally stored data playback is completed, providing the user with enhanced control over their viewing experience.

Allowable Subject Matter

6. Claims 1-12 and 25-42 are allowable over the prior art of record.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
